

CLAIMS

What is claimed is:

1. An apparatus of a multiple function memory card,
5 which is a fixed in a digital camera, said apparatus comprises:

a data/signal control unit, said data/signal control unit being
connected with said digital camera and a personal digital assistant to
transmit an image datum, which is produced from said digital camera;
and

10 a memory, said memory being connected with said data/signal
control unit and said personal digital assistant to save a backuped
datum of said personal digital assistant and said image datum.

2. The apparatus according to claim 1, wherein said
15 memory is a volatile memory.

3. The apparatus according to claim 2, wherein said
volatile memory is a compact flash.

20 4. The apparatus according to claim 2, wherein said
memory can be used to save said image datum forever.

5. An apparatus of a multiple function memory card,
which is a fixed in a digital camera and is used in a personal digital
25 assistant, said apparatus comprises:

a data/signal control unit, said data/signal control unit being
connected with said digital camera and a personal digital assistant to
transmit an image datum, which is produced from said digital camera;

said personal digital assistant comprising a driver, wherein said personal digital assistant can provide a digital camera mode and a datum memory mode for a user when said driver detects said multiple function memory card; and

5 a memory, said memory being connected with said data/signal control unit and said personal digital assistant, wherein said memory is used to save said image datum when said digital camera mode is selected and said memory is used to save a backuped datum of said personal digital assistant when said datum memory mode is selected.

10 6. The apparatus according to claim 5, wherein said memory is a volatile memory.

15 7. The apparatus according to claim 6, wherein said volatile memory is a compact flash.

8. The apparatus according to claim 5, wherein said memory can be used to save said image datum forever.

20 9. The apparatus according to claim 5, wherein said memory can be used to save said backuped datum forever.
